

# Average home energy storage price per 5kW in Spain

What is Spain's energy storage strategy?

Spain's government has approved an energy storage strategy that it says will put the country "at the forefront" of what is being done in Europe and help it move towards its 2050 climate neutrality target. The roadmap foresees the country ramping up its storage capacity from the current 8.3GW level to 20GW by 2030 and then 30GW by 2050.

Is Spain ready for a greener energy future?

Spain's electricity market is undergoing a rapid and remarkable transformation. From record-breaking renewables to smarter tariffs and sweeping policy updates, the 2023-2025 period is setting the stage for a greener, more flexible energy future.

Is your electricity bill rising in Spain?

The average electricity bill in Spain may be rising, but that doesn't mean your bill has to. By understanding your usage, optimizing your plan, and adopting solar self-consumption, you can reduce your energy costs and gain long-term stability.

What is a dynamic electricity tariff in Spain?

Spain is a European pioneer in dynamic electricity tariffs - plans where prices change every hour, based on wholesale rates. The most common dynamic option? PVPC (Precio Voluntario para el Pequeño Consumidor) - the regulated hourly tariff used by ~ 1/3 of households. In 2024, it was reformed to include futures prices, reducing volatility.

Why did the electricity bill rise in Spain in January 2025?

The average electricity bill in Spain rose significantly in January 2025 due to key regulatory changes. These included: VAT increase from 10% back to 21%, as outlined in Royal Decree-Law 8/2023. Higher tolls and system charges, revised by CNMC and the Ministry for the Ecological Transition.
