

# Average portable ESS system price per 150MW in Italy

Does Italy have a battery storage market?

The research and analysis conducted for this report were supported by the European Climate Foundation. This report is part of a series that analyses the battery storage market in select European countries. Italy has both a rapidly growing utility-scale market as well as a flourishing customer-sited battery storage market.

How many electricity markets does Italy have?

Italy has eight electricity market (and price) regions. The BESS figure is a big jump on the CM auctions for 2025 and 2026 delivery years, which saw 80-90MW of BESS capacity awarded contracts in each.

Will Italy achieve 30-40 GW of battery storage capacity by 2050?

By 2050, Italy aims to achieve 30-40 GW of storage capacity. There are significant regional differences in the adoption of battery storage systems across the country. While most distributed battery adoption is occurring in the north, most of the larger-scale storage projects are in the south and on Italy's largest island, Sardinia.

Why is Customer-Sited storage so popular in Italy?

Customer-sited storage adoption has been mainly driven by a combination of high electricity prices and generous tax incentives. For utility-scale systems, Italy has established favourable electricity market rules that enable projects to earn revenues from a range of different sources.

What policies bolster the Italy BESS market?

Some notable policies bolstering the Italy BESS market include: Italian National Energy and Climate Plan (PNIEC): Italy's PNIEC outlines the country's energy and climate goals, including targets for renewable energy expansion and greenhouse gas emissions reduction.

How much does a MWh system cost?

MWh (Megawatt-hour) is a measure of energy capacity (how long the system can continue delivering that power output). For example, a 1 MW / 4 MWh BESS has four hours of storage capacity. So, while the system might be \$200,000 per MW, the effective cost can be \$800,000 per MWh if it has four hours duration.

BESS, or battery energy storage systems, are an essential element of the energy transition: the Enel Group is playing an important role in the growth of the sector, in Italy and in the other countries where it is present.

The residential market in 2016 accounted for over 60% of the value of new installations, thanks to the tax deduction of 50% in ten years, but especially to the ESS Grant of the Lombardy region for PV systems up to 20 kWp.

## Average portable ESS system price per 150MW in Italy

UPS battery system from publication: Dual-purposing UPS batteries for energy storage functions ...

In the context of a Battery Energy Storage System (BESS), MW (megawatts) and MWh (megawatt-hours) are two crucial specifications that describe different aspects of the system's performance. Understanding the ...

Zurich-based energy storage owner-operator BW ESS and Italian peer ACL Energy have agreed to expand their existing battery energy storage system (BESS) partnership in Italy by committing to co-develop 11 ...

While the Energy Storage Systems (ESS) market size in Italy was US\$ XX million in 2019, and it is expected to reach US\$ XX million by the end of 2026, with a CAGR of XX% during 2020-2026.

A render of a BESS project that was provided by BW ESS when the partnership was initially announced in February. Image: BW ESS. BESS owner-operator BW ESS and developer ACL Energy have expanded their ...

According to BloombergNEF's recently published Energy Storage System Cost Survey 2024, the prices of turnkey energy storage systems fell 40% year-on-year from 2023 to a global average of US\$165/kWh. The ...

On Feb. 26 Terna announced the results of its capacity market auction, allocating 43 GW for the delivery year 2027, for more than EUR1.847 billion. Industry insiders expects that battery storage projects have accounted for ...

Hints are given that costs are falling further: a December 2024 bid in China for 16 GWh for "battery enclosures + PCS (Power Conversion System)," therefore excluding EPC and grid connection costs, had an average ...

The global energy storage market almost tripled in 2023, the largest year-on-year gain on record. Growth is set against the backdrop of the lowest-ever prices, especially in ...

November 21, 2024 ACL Energy and BW ESS have announced a significant expansion of their joint project development pipeline for stand-alone, utility-scale battery energy storage systems (BESS) in Italy. Building on their initial ...

In the first quarter of 2024, the global energy storage market continued to show positive growth trends. Specifically in Europe, Germany, Italy, and Spain sustained rapid growth in their energy storage sectors. Notably, ...

The average annual reduction rates are 1.4% (Conservative Scenario), 2.9% (Moderate Scenario), and 4.0% (Advanced Scenario). Between 2035 and 2050, the CAPEX reductions ...

## **Average portable ESS system price per 150MW in Italy**

The global energy storage market almost tripled in 2023, the largest year-on-year gain on record. Growth is set against the backdrop of the lowest-ever prices, especially in China where turnkey energy storage system ...

To explore the key issue of pricing for energy storage systems in Italy, pv magazine Italy spoke with several distributors active in the market. All were in agreement: prices declined in 2024, and while the trend is expected to ...
