

# Average residential ESS price per 150MW in Philippines

What happened to electricity prices in the Philippines in 2025?

By Green Tiger Markets Electricity prices in the Philippines have taken a notable dip in 2025. The first half of the year has seen the average spot market price hover around PHP 4 per kilowatt-hour, a sharp fall from PHP 5.80 over the same period in 2024. For consumers, this spells relief.

Why is electricity so expensive in the Philippines?

Key contributors include reliance on imported fuel, inefficiencies in the power grid, high system losses, and market structures that don't favor consumers. Unlike other countries that benefit from abundant local resources or well-managed energy systems, the Philippines grapples with challenges that make electricity expensive for everyone.

How much does a spot settlement cost in the Philippines?

According to ERC's market analysis, the average effective spot settlement price (ESSP) for all grids across the Philippines was Php 6.505 per kilowatt-hour, which is over Php 1 cheaper compared to the average ESSP of Php 7.885/kWh in 2022.
