

Construction of nauru energy storage project begins

What is Nauru port development project?

The proposed Port Development Project (the project) will improve port operations in Nauru by constructing a quay wall and access causeway at Aiwo, reconstructing port buildings, container storage and strengthening institutional capacity of the Nauru Ports Authority (NPA).

What are the renewable energy sources in Nauru?

The renewable energy sources in Nauru are solar radiation and a small amount of biomass. However, as the electricity is supplied from diesel generation and has been abundantly available over the past 80 years, these other renewable energy sources have not been extensively exploited.

How much money will be spent on environmental projects in Nauru?

This is currently estimated at \$17.30 million and will cover \$7.70 million of the expenditure related to civil works, \$6.60 million for additional physical contingencies, and \$3.00 million of in-kind contributions. Funded by the Asian Development Bank, Green Climate Fund, Australian Government (DFAT) and Government of Nauru.

What is the purpose of the projects Nauru has participated in?

The purpose of the projects Nauru has participated in is to determine more scientifically and quantifiably the likely mechanisms, rates of change and impacts that climate change is likely to have for the region and in particular for Nauru.

How will Nauru Utilities Corporation benefit from project preparatory technical assistance?

The project will also support the institutional strengthening of Nauru Utilities Corporation. Project preparatory technical assistance was used to carry out project-enabling activities such as a Solar Power Expansion Plan for Nauru, project feasibility study, detailed design, and plant procurement contract bidding documents.
