

Containerized BESS project financing options in Libya 2030

Is blended financing a viable financial model for Bess projects?

As per McKinsey & Company, the market size of the BESS ecosystem is expected to reach \$150 billion by 2030. Thus, blended financing as a financial model should be considered, where public capital can be used as a first-loss capital for BESS projects. This offers private financiers the comfort of providing capital at a competitive rate.

How big is the containerized Bess market in 2025?

This is a paid press release. Contact the press release distributor directly with any inquiries. DELRAY BEACH, Fla., Aug. 23, 2025 /PRNewswire/-- The global containerized BESS market is projected to grow from USD 13.87 billion in 2025 to USD 35.82 billion by 2030, at a CAGR of 20.9% according to a new report by MarketsandMarkets(TM).

What is the global Bess capacity in 2023?

As per the International Energy Agency (IEA), global BESS capacity was 85 GW (approximately 190 GWh) at the end of 2023 and is expected to reach 400 GW (over 1,200 GWh) by 2030 to enable the seamless grid integration of renewable energy, with the net zero 2050 emissions scenario as a target.

Where are the capital flows for Bess concentrated?

The IEA states that capital flows for BESS are concentrated in China and other developed countries due to the high cost of capital for clean energy projects in emerging economies.

Can Bess projects be bundled together?

Independent BESS projects, only supporting renewable energy projects, can be bundled together, and issued as green bonds to potential large investors.

Why are capital flows for Bess concentrated in China and the developed world?

IEA states that capital flows for BESS are concentrated in China and the developed world because of the high cost of capital for clean energy projects in emerging economies.
