

Depreciation of energy storage equipment

What is electric energy storage equipment?

The 2018 amendment to Title 4-C of New York's Real Property Tax Law defines "electric energy storage equipment" as a set of technologies capable of storing electric energy and releasing that energy as electric power at a later time.

Should a business deduct a depreciable basis over 5 years?

Allowing businesses to deduct the depreciable basis over five years reduces tax liability and accelerates the rate of return on a solar investment. This has been a significant driver for the solar industry and other energy industries.

What is the annual abatement for energy storage systems?

The annual abatement for energy storage systems is generally equal to the lesser of 10% of the energy storage system's costs or \$62,500. The annual abatement for solar energy generating systems is generally equal to the lesser of 5% of the project's costs or \$62,500.

Are energy properties eligible for the TCJA bonus depreciation schedule?

Energy properties acquired in 2017--the year the TCJA was adopted--are subject to special rules. A property "acquired" before September 27, 2017 is only eligible for the pre-TCJA bonus depreciation schedule (i.e., 50%), even if such property is placed into service after that date.

What equipment qualifies for a cost recovery period?

Some examples of classes include television and radio broadcasting equipment, which qualify for a cost-recovery period of five years and office furniture and equipment, which qualify for a cost-recovery period of seven years. Qualifying solar energy equipment is eligible for a cost recovery period of five years.

Are energy storage systems eligible for the ITC?

Energy storage systems that are charged by the renewable energy system 100% of the time on a yearly basis are eligible to claim the full value of the ITC. These guidelines generally apply to energy storage systems that are installed at the same time as the renewable energy system.
