

What is a desktop charging station?

Shop our desktop charging stations and stay charged and organized wherever you go now! A desktop charging station is a compact device designed for desktops that can conveniently charge multiple electronic devices simultaneously from a single power source.

Do portable power stations offer uninterrupted power?

No, most portable power stations do not offer true uninterrupted power. A UPS must auto-switch in 10 milliseconds (ms) or less during a power outage or brownout to support sensitive electronics like desktop computers and data storage. Most portable power stations switch over in 30ms or more.

What are the best portable power stations?

EcoFlow portable power stations are among the best portable power stations--battery-powered generators that keep your gear running anywhere. With a range of capacities, outputs, and ports, there's a fit for every need--whether it's home backup, camping, RV trips, DIY workstations, or emergencies.

What can a portable power station charge?

A portable power station can charge and power a variety of devices, from small electronics like smartphones, tablets, laptops, and cameras to larger appliances such as mini-fridges, TVs, and even power tools.

How do portable power stations work?

Portable power stations have control panels with LED displays and buttons that turn off and on inputs and display usage and remaining power. Most portable power stations are also compatible with Bluetooth and Wi-Fi, allowing you to monitor and control them remotely from a smartphone app.

How do I know if a portable power station is good?

Check the output wattage and battery capacity to see what a portable power station is capable of. The Westinghouse iGen160s is a basic little power station capable of keeping your electronics charged during a brief power outage or camping trip. I like that it has a flashlight (perfect for getting set up in the dark when the power is out).
