

# Does energy storage distribution transformer charge capacity electricity fee

What is a capacity fee for grid energy storage?

The capacity fee for grid energy storages is a component similar to the capacity fee for power plants, and it is billed to the electricity storage facility for the sum of the rated capacity of its consumption and production power. For example, a 20 MW electricity storage facility is charged a capacity fee based on its 40 MW capacity.

Are electricity storage facilities billed only for energy taken from the grid?

Changes to the main grid fees for electricity storage facilities Unlike other network users, electricity storage facilities have been invoiced only for energy taken from the grid and supplied to the grid as part of their main grid service fees.

How much does electricity storage cost in 2025?

For example, a 20 MW electricity storage facility is charged a capacity fee based on its 40 MW capacity. In 2025, the electricity storage capacity charge will be EUR87.5/MW per month, i.e. half the capacity fee for a power plant.

Why do power plants have capacity charges?

The rationale behind capacity charges stems from the need to incentivize both generators and consumers to maintain a balanced and reliable electricity grid. Power plants must be available and ready to produce energy when demand spikes, even if they run infrequently or at partial capacity.

What is a capacity charge?

One significant yet often misunderstood component is the capacity charge. As electricity systems become more complex with the integration of renewable energy and demand-side management, capacity charges play a crucial role in ensuring grid reliability and economic efficiency.

Can battery energy storage avoid TNUoS costs?

Because import tariffs only apply to energy imported during the three Triads, battery energy storage can avoid all TNUoS costs by not importing across these periods. Distribution Use of System (DUoS) charges cover the cost of maintaining local distribution networks and depend on the Distribution Network Operator licence area.
