

When will long duration energy storage be available in Ireland?

The Irish Electricity Storage Policy Framework, published after this data was collected, indicates that an immediate route to market for 500 MW of long duration energy storage is currently being developed, with further studies planned to support long duration storage from 2030 to 2040 (Government Of Ireland 2024a).

What is the electricity storage policy framework for Ireland?

In line with CAP Action EL/24/16, the Electricity Storage Policy Framework for Ireland (ESPF) was published by my Department in July 2024. The policy framework included 10 Government actions to support the role of electricity storage systems in Ireland's energy transition.

Does Ireland need an energy storage policy?

The Irish Government's Climate Action Plan 2021 set out the need for an energy storage policy for Ireland to support 75% reduction in power sector CO2 emissions by 2030. There are 10 key policy actions in the framework outlining the timings and key stakeholders involved in delivering them. Key points:

What is Ireland's energy transition policy framework?

The policy framework included 10 Government actions to support the role of electricity storage systems in Ireland's energy transition. Actions #6 to #10 of the policy framework are designed to stimulate the development of the optimum level of electricity storage systems, including Long Duration Electricity Storage on to the grid network by 2040.

Will Ireland be a business-friendly market for energy storage?

The publication of the Electricity Storage Policy Framework sends a clear and positive signal to potential developers and funders that Ireland intends to be a business-friendly market for energy storage, writes Seanna Mulrean, Consultant and Head of Energy and Natural Resources at LK Shields.

Is Ireland a game changer for long duration energy storage?

Ireland - A Game Changer for Long Duration Energy Storage? This is the first electricity storage policy published in Ireland. The Irish Government's Climate Action Plan 2021 set out the need for an energy storage policy for Ireland to support 75% reduction in power sector CO2 emissions by 2030.

Innovative financing models and public-private partnerships are paving the way for the large-scale deployment of energy storage technologies essential for integrating ...

In part one of this article, we discussed the types of energy storage and the incentives that are supporting its development. Now let's look at the financing issues and the project risks ...

Domestic energy storage project financing options in Ireland 2026

Foreword As part of the U.S. Department of Energy's (DOE's) Energy Storage Grand Challenge (ESGC), DOE intends to synthesize and disseminate best-available energy storage data, ...

To assess the impacts of these developments on investment and deal flow, the American Council on Renewable Energy (ACORE) surveyed companies that actively develop or finance U.S. ...

Energy Storage Financing The Energy Storage Financing study series is an outreach effort to the financial industry to help reduce and mitigate the risk of investing in energy storage ...

We continue our Spotlight Series with a focus on Ireland, where battery storage to support high levels of wind generation was once flourishing, but the route to market is now ...

Implement the national energy storage strategy (electricity storage policy framework) with input from industry to set clear objectives and actions and put in place resources in Government, the ...

Financing structure options for standalone storage projects and hybrid solar plus storage projects. The pool of potential investors in these projects by allowing project owners to transfer ...

SSE Renewables has acquired a fully consented 100MW / 200MWh battery storage project near Dungannon, County Tyrone, Northern Ireland, from Heron Energy, part of the leading construction, property ...

Over the next 30 years, Ireland will transform into a digital, decarbonized powerhouse powered by EVs, AI data centres, and advanced renewable technologies. Smart ...

In line with Action #6, EirGrid, in conjunction with the Regulatory Authority, are developing a procurement mechanism for long-duration electricity storage, through their Long ...

On Aug. 16, 2022, President Joe Biden signed into law the Inflation Reduction Act of 2022 (IRA), which includes new and revised tax incentives for clean energy projects. This alert provides a summary of the ...

On January 16, 2025, the U.S. Department of the Treasury and IRS released updated guidance known as the First Updated Elective Safe Harbor on the domestic content bonus credit. This guidance modifies Notice 2024-41 from ...

Our range of products is designed to meet the diverse needs of base station energy storage. From high-capacity lithium-ion batteries to advanced energy management systems, each ...

The U.S. Department of the Treasury released additional guidance on the Inflation Reduction Act's domestic content tax credit bonus for solar and battery energy storage projects. The guidance today builds on the ...

Domestic energy storage project financing options in Ireland 2026

Aghada Battery Project, Co Cork We commissioned our first battery energy storage system at our Aghada generating site in Co Cork in 2022, capable of generating 19MW. We added a second battery on the same site in 2024 with ...
