

Energy storage electricity prices in costa rica

What is the electricity price in Costa Rica?

The residential electricity price in Costa Rica is CRC 90.880 per kWh or USD 0.175. The electricity price for businesses is CRC 113.350 kWh or USD 0.219. These retail prices were collected in December 2023 and include the cost of power, distribution and transmission, and all taxes and fees. Compare Costa Rica with 150 other countries.

Why does Costa Rica use a lot of electricity?

The latter is due to the fact that in Costa Rica a good percentage of electrical energy is generated from water resources (hydroelectric energy). Water must be used more efficiently, for example, by installing water reuse systems, collecting rainwater for irrigation and other uses, and installing other existing appliances to save water.
