

Due to its flexible charging-discharging characteristics, the electrochemical energy storage system (ESS) is considered one of the practical tools to enhance power quality and energy ...

The principles of various energy storage technologies applied in multi-energy complementary system are summarized, and the advantages and disadvantages of these technologies are ...

Supercapacitor Energy Storage Systems: Technology, Performance and Applications Print Special Issue Flyer
Special Issue Editors Special Issue Information ...

Yinghui Gao's 32 research works with 196 citations and 3,197 reads, including: The Incremental Capacity Curves and Frequency Response Characteristic Evolution of Lithium Titanate Battery ...

JIANG Wenkun, HAN Yinghui, XUE Zhiwen, et al. Energy storage technologies and their applications in multi-energy complementary power system [J]. Integrated Intelligent Energy, 2022, 44(1):63 ...

???: ??, ????????, ??????, ??????, ????, ?????? Abstract: Since hydrogen energy is of high energy density and good ...

However, the fabrication of flexible energy-storage devices remains a tremendous challenge due to the intrinsic dissimilarities between electrode and electrolyte.

Black magic: Recent advances in black phosphorus applications in energy conversion and storage are comprehensively reviewed. Black phosphorus possesses ...

?? Opening Two-Dimensional Materials for Energy Conversion and Storage: A Concept
?????????????????:???? ???? ???? ???? ?? ...

Prof. Yinghui Han is an associate professor at the College of Resources and Environment in University of Chinese Academy of Sciences. She conducts research in multidisciplinary field of ...

Supercapacitors are widely used in China due to their high energy storage efficiency, long cycle life, high power density and low maintenance cost. This review compares the differences of ...

[14] Jiang Wenkun, Han Yinghui, Xue Zhiwen, et al. Energy storage principle and its application in multi-energy complementary energy system [J]. Comprehensive smart energy, 2022 (1): 63 - 71.

Yinghui Li's 5 research works with 70 citations and 281 reads, including: Chemical vapor deposition-grown

carbon nanotubes/graphene hybrids for electrochemical energy storage and ...
