

# Energy storage label and energy release label

What are energy labels?

Energy labels are clear, easy-to-understand colour rankings based on the energy efficiency of products.

Where should energy labels be displayed?

The energy label must be clearly displayed on each product at the point of sale, including in online stores. Find more product-specific information on energy labelling and ecodesign requirements.

How do I display the energy label information in eprel?

For online or distance selling, the energy label information must be clearly displayed close to the price. You can either display the full energy label or just the energy class arrow with a link to the label and to the product information sheet. You may locally upload label and sheet, or link to the product registration in EPREL.

Where can I find energy standards & labeling?

[.energy.gov/eere/buildings/articles/north-america-energy-efficiency-standards-and-labeling](https://www.energy.gov/eere/buildings/articles/north-america-energy-efficiency-standards-and-labeling). Official Journal of the European Union. Regulation (EU) 2017/1369 of the European Parliament and of the Council of 4 July 2017 Setting a Framework for Energy Labelling and Repealing

How do I display a full energy label?

You can either display the full energy label or just the energy class arrow with a link to the label and to the product information sheet. You may locally upload label and sheet, or link to the product registration in EPREL. As technologies evolve, so do the rules.

Will Washington State require labeling for EOL management?

Washington State will require labeling for EOL management; these labeling requirements are under development as of January 2025. For large format vehicle batteries, motive equipment batteries, and stationary storage batteries, voluntary standards and example labels aim to improve safety for recyclers and for reuse.
