

# Energy storage power station service lease agreement

Who owns the energy in an energy storage tolling agreement?

Therefore, the energy in the system belongs to the offtaker. As part of an energy storage tolling agreement, the seller is usually required to arrange for separate station service in order to not use the offtaker's electricity.

Do energy storage tolling agreements restrict a developer's use of a battery?

As the energy stored in the battery belongs to the buyer, energy storage tolling agreements will often prohibit or restrict the developer's use of the storage system for station service. The inclusion of this condition requires that the developer enters into a retail service contract for the system's non-storage load.

How do I negotiate site control documents for a battery energy storage project?

Negotiating and drafting the site control documents for a battery energy storage project requires an understanding of the potential risks that are unique to battery storage and a grasp of what is market in order to reach a solution that works for all parties, including future lenders and tax equity investors.

How does a battery energy storage project differ from a wind or solar project?

While the development process for a standalone battery energy storage project typically does not differ significantly from its wind or solar counterparts, there are several considerations unique to the nature of battery storage to consider when negotiating the site control documents for the project. Site Conditions
