

Energy storage product user feedback survey

What is a product experience survey?

A product experience survey gathers data on how customers use the app, what they value, and what they want to change. There is a difference between a product satisfaction survey and a customer satisfaction survey. The former concentrates on how users experience the product only, not the customer service, website, pricing, etc.

Should a B2B or B2C company conduct product feedback surveys?

Any B2B or B2C company should regularly conduct product feedback surveys. This helps stay on top of user experience and find all opportunities for product development. In this blog post, we'll go through eight of the most popular product survey templates available in Survicate.
