

Are energy storage systems in demand?

Energy storage systems are increasingly in demand to increase the effectiveness of solar power arrays, with the Energy Information Administration estimating in February that new utility-scale electric-generating capacity on the U.S. power grid will hit a record in 2025 after a 30% increase over the prior year.

Is Bloom Energy a good energy storage stock?

Bloom Energy is one of the smaller picks on this list, but it may be the most dynamic energy storage stock out there. It specializes in advanced fuel cell energy platforms, which use a proprietary solid oxide technology to convert natural gas, biogas or hydrogen into electricity with low or even zero carbon emissions.

How many 'Energy Servers' are there?

Its so-called 'energy servers' are deployed in more than 1,000 locations across nine countries, providing critical backup power for businesses, essential service providers like hospitals and others. The stock is up about 30% year to date even as U.S. policy has moved away from alternative energy.
