

# Expected ROI of wind solar storage project in Mexico 2026

Why do we need a wind energy portfolio in northern Mexico?

The necessity of diversifying the renewable energy portfolio with wind energy in northern Mexico arises from its potential to enhance energy security, mitigate risks associated with dependence on a single energy source, and stabilize energy supply .

How much solar power does Mexico need in 2024?

To meet the 35% clean energy target in 2024, Mexico needs at least 128.83 TWh or 42.56 TWh of additional clean energy generation. National solar PV capacity potential is estimated at 24,918 GW.<sup>1</sup> This potential capacity could generate 50,196 TWh/yr or 137 times the 365 TWh estimated demand for Mexico in 2024.

Can solar be used as a wind energy source in Mexico?

Solar deployment can follow wind transmission. Targeted grid upgrades, if any, for wind, will benefit solar as well because solar resources exist in all areas of the country. Solar potential in Mexico is six times larger than wind, and the technology complements wind generation very well.

Can Mexico produce solar energy?

With over 2,000 hours of sunshine annually, the country has immense potential for solar energy production. The northwestern states, including Baja California and Sonora, have the ideal conditions for large-scale solar projects. Studies estimate that Mexico could generate 50,196 TWh/year of solar energy--137 times its domestic energy demand.

How many renewable resources does Mexico have?

Figure 1 shows that Mexico's renewable resources are well distributed throughout the country. National technical potential includes 24,918 GW<sup>2</sup> of solar photovoltaics, 3,669 GW<sup>2</sup> of wind, 2.5 GW<sup>3</sup> of conventional geothermal, and 1.2 GW<sup>4</sup> of additional capacity from existing hydropower facilities.

How many solar power plants will the CFE develop in 2025?

To do so, the CFE plans to develop 7 wind projects, 9 solar PV power plants (673 MW), 5 natural gas-fired CCGT power plants and one internal combustion project (240 MW) over a six-year period. Tenders will be launched for the development of the projects by the end of April 2025.

Chile passed an energy storage and electromobility bill in late 2022, making stand-alone storage projects profitable for operators. However, the market is still awaiting new ...

Solar Installed System Cost Analysis NREL analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems. This work has ...

## Expected ROI of wind solar storage project in Mexico 2026

16 ????&#0183; Local and tribal governments in New Mexico can expect to begin applying for state funding to support solar energy projects by the end of the year, state officials told lawmakers ...

The US Energy Information Agency (EIA) has forecast that power generation growth in the country up to 2027 will be driven predominantly by solar capacity additions, in its latest short-term energy outlook. The EIA ...

The average cost of natural gas for power generation in our forecast increases another 17% in 2026. Coal production U.S. coal production in our forecast totals 520 million short tons (MMst) in 2025, 2% higher than last ...

Spending on low-emissions power generation has almost doubled over the past five years, led by solar PV. Investment in solar, both utility-scale and rooftop, is expected to reach USD 450 ...

TBEA announced plans to invest in large-scale renewable energy projects, including a 1 GW solar power plant with battery storage and a 2 GW wind power project, also paired with energy storage. The ...

The current and expected fleet of renewables and energy storage is expected to pay almost \$50 billion in lifetime landowner payments and local taxes. Over their lifetime, the current fleet of ...

ICRA expects India to add 22 GW of new solar power generation capacity in FY 2025 and 27.5 GW in FY 2026, taking its cumulative installed PV capacity to 131.5 GW from 82 GW as of March 31, 2024.

Of this figure, Solar PV accounts for 1,618MW, natural gas for 1,002MW and energy storage for 682MW of installed capacity. Notably, while energy storage and solar PV ...

Enlight Renewable Energy's Atrisco solar and energy storage project. Image: Clenera IPP Enlightenment Renewable Energy has completed commissioning its flagship Atrisco solar ...

Driven by the goal of energy transformation, Spain's energy storage industry is full of potential, with continuous technological innovation and progress. The government has given strong support in terms of funds and policies, and the ...

In our January 2024 Short-Term Energy Outlook, which includes data and forecasts through December 2026, we forecast five key energy trends that we expect will help ...

The Mexican Government has presented the Plan for the Strengthening and Expansion of the National Electric System 2025-2030 of the state-owned Federal Electricity Commission (CFE). The plan expects includes ...

## **Expected ROI of wind solar storage project in Mexico 2026**

Wind and solar generation in Mexico need to increase around 6x by 2030, compared to 2022 levels, to be 1.5oC compatible. Projected wind and solar rollout in Mexico falls short of ...

Tenders will be launched for the development of the projects by the end of April 2025. The investment is expected to bring electricity to more than 500,000 homes and to provide energy to 99% of the population through a ...
