

Goldwind technology energy storage full name

Does Goldwind offer a battery energy storage system?

Goldwind launches a new generation of DC side 0 parallel high-efficiency modular liquid-cooled electrochemical energy storage system Goldwind launches new generation modular liquid cooling BESS(Battery Energy Storage System) system for utility-scale renewable power plants.

What is Goldwind solution?

Goldwind Solution The new generation of electrochemical energy storage system launched by Goldwind adopts the modularized DC 0 parallel technology for electrical isolation and physical isolation, which eliminates the circulating current in the battery due to parallel connection, eliminates the simple fault point, and has higher safety.

How does Goldwind improve battery performance?

Goldwind has replaced the traditional air-cooled system with a liquid cooling system. This improves the performance of the battery system, reduces the temperature of the battery by 2 degrees Celsius, and also reduces the total area by more than 35%, greatly improving the cost efficiency of the whole system. Application scenarios
