Who surveys the solar market in Switzerland?

The Swiss Federal Office of Energy has been surveying the solar market in Switzerland for more than 20 years. Due to this long experience, the quality of the data has been maintained, thanks as well to all the installers and distributors who are willing to complete the annual questionnaire.

Is there a tendering scheme for PV systems in Switzerland?

There are no tendering schemes for PV systems in Switzerland. There are, however, several auction platforms for selling/buying green certificates (guarantee of origin). The price for those certificates has constantly dropped over the past years. There are no specific utility-scale measures in place in Switzerland.

How much support does SFOE provide for Photovoltaics Research in Switzerland?

On average, the volume of the SFOE programme support (including pilot and demonstration) is in the order of 10% of the total public support for photovoltaics research in Switzerland, which is in the order of 36 MCHF per year (including roughly 30% from European projects) (<https://pv.energyresearch.ch/projects>).

What is the potential of a roof-top PV system in Switzerland?

Since April 2019, it also includes the potential of facades of 17 TWh. This potential is considered somewhat optimistic. A more detailed analysis estimates the Swiss roof-top PV potential to be 24 TWh. Therefore, the potential of facades and other surfaces (parking, floating PV, ...) will probably need to be exploited.
