

# Government procurement price of Solar Panel in Netherlands

Should you install solar panels in the Netherlands?

Another reason to consider installing solar panels in the Netherlands right now is that the Dutch government will actually foot part of the bill. Currently, the Dutch government is offering a sustainable energy investment grant (ISDE) to compensate for the cost of energy-saving and sustainable installations.

Why is the Dutch government losing money on solar panels?

Because solar panels have become an extremely popular investment, the Dutch government is losing money by compensating everyone who sells their energy into the grid. Originally, the Netherlands was going to shift to the terugleververgoeding policy in 2031, after salderingsregeling ended.

How does the Dutch government support solar panels?

The Dutch government recognizes the importance of a green transition and actively supports residents and businesses in their solar endeavors. Here are some ways the government lightens the financial load: Periodically, the government rolls out subsidy programs to offset the initial costs of solar panel installation.

How many solar panels does a Dutch House need?

The number of solar panels needed for your home also depends on a few factors, including: The average home installation falls between 10 to 12 solar panels, which would partially power the average Dutch house with solar energy. Solar panels can cover your entire roof in the Netherlands, depending on your energy needs.
