

# Government procurement price of home energy storage in Poland

How can energy storage facilities be improved in Poland?

Introduction of preferential loans for companies investing in energy storage facilities. Increasing the installed capacity of energy storage facilities by 300% by the end of 2025. Increasing the share of RES in Poland's energy mix to 35% in 2025. Reduction of CO2 emissions by 15 million tons per year.

Why is energy storage subsidy important in Poland?

Energy storage subsidy programs are crucial to stabilizing Poland's electricity grid. An increase in the number of storage installations affects the flexibility and reliability of the power system. Balancing energy supply and demand. Reducing the load on the grid during peak hours. Integration of renewable energy sources (RES).

Will energy storage subsidy programs accelerate Poland's energy transition?

The development of energy storage subsidy programs in 2024-2025 has great potential. The planned activities will accelerate Poland's energy transition, supporting the development of technologies and the creation of new jobs in the energy sector. Energy storage subsidy programs are crucial to stabilizing Poland's electricity grid.

How much money will Poland receive from the modernization fund?

Funding for the program comes from the Modernization Fund (FM), which underscores the importance of the project for modernizing the energy system. By 2030, Poland could receive about 60 billion zlotys from the FM for energy transition goals. The call for applications runs from June 17, 2024 to June 16, 2025, or until funds are exhausted.

Will energy storage systems projects be subsidised under the National Recover & Resilience Plan?

The call for proposals of projects to be subsidised under the Energy Storage Systems scheme financed from the National Recover and Resilience Plan opened on 17 February 2025. More [#187](#);

How much subsidy is available for solar installations?

The maximum subsidy available for solar without storage is PLN 6,000, increasing to PLN 7,000 for solar micro-installations with storage. Any solar installations connecting to the grid after Aug. 1 must be paired with electric storage facilities and/or heat storage facilities to be eligible. The installations can range from 2 kW to 20 kW in size.

The average spot price of CO2 in 2022 amounted to \$44.2/t CO2. Poland's revenue from the sale of CO2 allowances was more than \$4.94 billion in 2022. There is an ongoing energy crisis, triggered by Russia's aggression ...

A total of PLN 4 billion (\$1 billion) will be distributed under the subsidy scheme by the end of 2025 in a bid to bring online more than 5 GWh of energy storage projects by 2028.
