

Government procurement price of solar plus storage in Mexico

Are energy storage projects a luxury in Mexico?

Energy storage projects are still considered as a luxury in Mexico as currently they are too expensive to be financially viable. Energy storage infrastructure will require private sector financing.

Will energy storage attract renewables investment in Mexico?

With Mexico's president-elect having announced an intent to attract renewables investment, energy storage was the subject of much discussion at the Intersolar Mexico trade show.

Can a battery energy storage system complement a PV plant in Mexico?

An analysis was carried out to verify if it would be commercially feasible to operate a Battery Energy Storage System (BESS) to complement the operation of a PV plant in the Mexican market. This PV plant would generate a revenue through the contracting via the 2015, 2016 or 2017 LTAs in Mexico.

How can industry integrate energy storage into the Mexican energy mix?

To integrate energy storage effectively into the Mexican energy mix, industry must lead the way in promoting links between academia, itself, government, and wider society to promote viable, scalable solutions.

Should energy storage be regulated in Mexico?

5.2.1. Mexico Energy storage appears scarcely in Mexican legislation and the few regulations that mention it leave the door open to potentially consider EST as either generation assets or transmission and distribution assets. If EST were regulated as generation assets, they could operate under a regime of free competition.

Which countries offer solar-plus-storage incentives?

Germany was the first electricity market to introduce incentives directly targeting residential solar-plus-storage systems. In 2013, the state-owned bank KfW launched programme 275, which offered low-interest loans and investment grants for 30% of the capital costs of solar-plus-storage installations until 2016.

To integrate energy storage effectively into the Mexican energy mix, industry must lead the way in promoting links between academia, itself, government, and wider society to promote viable, scalable solutions.

Solar Storage Mexico is the first exhibition and conference specialized in the energy and solar technology segment, a business with growth rates of over 25. Solar + Storage Mexico 2024 is ...

1 Overview This report provides a high-level summary of the role that battery storage technologies can play in Mexico's transition toward higher penetrations of variable renewable energy ...

Solar power has come a long way in Mexico, with 6,160 MW of cumulative utility-scale solar capacity at the
