

Government subsidies for large energy storage

Do government subsidies affect the R&D of large-scale energy storage projects?

Government subsidies may have a stronger effect on the R&D of large-scale ESEs. Currently, the energy storage projects show a trend of continuous scale-up, and large ESEs are more likely to construct large-scale "wind power +PV +energy storage" projects.

How do government subsidies help energy storage enterprises?

Government subsidies alleviate the financial constraints of energy storage enterprises. Government subsidies promote R&D investment in energy storage enterprises. Differentiated subsidy strategies can generate higher TFP improvement returns. Government subsidies are an important means to guide the development of the energy storage industry.

Why are government subsidies important?

Government subsidies are an important means to guide the development of the energy storage industry. As countries around the world are increasing government subsidies to energy storage enterprises (ESEs), how to effectively utilize these subsidies has become a focus of attention.

Are government subsidies effective in reducing energy storage financing constraints?

Large ESEs with sufficient collateral and high technological maturity of their energy storage products are more likely to receive government subsidies and external financing from the banking sector. As a result, government subsidies are more effective in alleviating the financing constraints of large-scale ESEs.

Do government subsidies improve TFP of energy storage enterprises?

Government subsidies improve the TFP of energy storage enterprises. The government's "picking winners" subsidy strategy is effective. Government subsidies alleviate the financial constraints of energy storage enterprises. Government subsidies promote R&D investment in energy storage enterprises.

What are the different types of energy subsidies?

The most obvious subsidies are the direct expenditures and R&D support from the federal budget. Tax expenditure subsidies are targeted tax incentives that producers or consumers of specific forms of energy receive. In this case, the government does not spend money, but it loses revenue that it would have otherwise received.

This paper aims to investigate how government subsidies affect the efficient development of ESEs and to provide policy insights for the establishment of a productive ...
