

Haichen Energy Storage, a leading provider of energy storage solutions, is committed to providing high-quality, reliable, and sustainable energy storage systems. Our products are designed to meet the needs of various applications, from residential to industrial, and we are proud to be a part of the global energy storage market.

The Haichen energy storage battery represents not only a technological advance but also a reimagining of how users approach energy management. With a focus on efficiency and cost-effectiveness, it establishes a new standard for energy storage solutions.

This synergy between energy storage and renewable sources is crucial for achieving long-term sustainability goals, ultimately positioning Haichen as a key enabler of the green energy transition.

Haichen Energy Storage has recently announced a major partnership with Saudi Power Company (SEC) for a large-scale battery energy storage system (BESS) project. This project, located in Tabuk, Saudi Arabia, will have a total capacity of up to 179 MWh, marking a significant milestone in the company's international expansion.

Saudi Power Company (SEC) announced the signing of a contract for a large-scale battery energy storage system (BESS) project with a total capacity of up to 179 MWh, marking a significant milestone in the company's international expansion.

At the event, Haichen Energy Storage launched its three innovative products, the Power 6.25MWh 2h/4h time-space customized large-capacity energy storage system, the first sodium-ion battery, and the first sodium-ion battery.

Haichen Energy Storage is committed to providing high-quality, reliable, and sustainable energy storage systems. Our products are designed to meet the needs of various applications, from residential to industrial, and we are proud to be a part of the global energy storage market.

From plateaus to deserts, rainforests to islands, Haichen's customized energy storage solutions have been reliably proven in practice, making it a key partner in numerous benchmark projects, such as the Haichen Energy Storage project in Saudi Arabia.

The synergy of all these elements positions Haichen as a leader in the energy storage industry, effectively addressing both current and future energy challenges while championing sustainable practices. Thus, those who invest in Haichen are investing in a sustainable future.

A core aspect of Haichen Energy Storage technology is its ability to store energy during low-demand periods and release it during peak times. This capability not only aids in balancing supply and demand but also enhances the overall efficiency of the energy system.

With a focus on quality and safety, allied to a vision for a sustainable energy landscape, Haichen is poised to make lasting contributions to energy storage and to facilitating the transition to a sustainable energy future.

Established in 2015, Haicen Power is a high-tech enterprise located in Shandong, mainly engaged in the R & D, manufacturing and sales of LiFePO4 lithium Batteries, including 26700 cylinder cells, 105Ah and 280Ah Prismatic cells, and other energy storage products.
