

Household energy storage tender price in Greece 2026

What is the quota for battery energy storage in Greece?

The quota for the latter is 50 MW. The program is part of the just transition efforts within Greece's coal phaseout, currently scheduled to be completed in 2026. Grants for the capital expenditure or capex for the battery energy storage systems (BESS) are set at EUR 200,000 per MW.

When will a battery storage project be up and running in Greece?

The awarded projects must be up and running by the end of April 2026, according to RAAEY. Greece awarded 400 MW and 300 MW of battery storage projects in earlier auction rounds held in 2023 and 2024. Marija has years of experience in a news agency environment and writing for print and online publications.

Will Greece provide a quota for battery projects in 2024?

Before the end of 2024, Greece intends to provide subsidies for standalone battery projects of 200 MW in total via the third auction. The Ministry of Environment and Energy issued a decree determining the available operating power quota.

How many projects have been awarded in Greece's first battery energy storage system?

The Greek Regulatory Authority for Energy has confirmed that 411.8 MW of projects have been awarded in the country's first standalone battery energy storage system (BESS) tender, which has attracted huge interest among developers. Investment and operating aid will be granted to 12 projects put forward by seven proponents.

Why is Greece launching a battery storage auction?

Initially a response to the COVID 19 pandemic, the focus has pivoted to support Greece's green energy transition. The storage auctions themselves require further approval under EU State aid rules. The pipeline of prospective battery storage projects now approaches 27GW, with over 500 projects granted a storage license.

Does Greece have a battery storage pipeline?

Greece has emerged as one of the countries with the largest pipeline of battery storage projects, but as yet there has been little activity on the ground. This is changing as the long-awaited storage subsidy auctions have started, with the first projects being awarded support for both investment and operating costs.

The Greek Regulatory Authority for Energy, Waste, and Water (RAAEY) has launched the country's third auction for standalone, grid-scale, front-of-the-meter battery energy storage systems.

The capex payment in the third auction is set at EUR 200,000/MW, up from EUR 100,000/MW in the second auction. The awarded projects must be up and running by the end of April 2026, according to ...
