How do I develop a valuation tool for energy storage?

Provide technical parameters and relevant data for three example use cases that could be used in a valuation tool. Identify a list of publicly available DOE tools that can provide energy storage valuation insights for ESS use case stakeholders. Provide information on the capabilities and different options in each modeling tool.

What are DOE energy storage valuation tools?

The DOE energy storage valuation tools are valuable for industry, regulators, and other stakeholders to model, optimize, and evaluate different ESSs in a variety of use cases. There are numerous similarities and differences among these tools.

How do you value energy storage?

Valuing energy storage is often a complex endeavor that must consider different policies, market structures, incentives, and value streams, which can vary significantly across locations. In addition, the economic benefits of an ESS highly depend on its operational characteristics and physical capabilities.

What is battery energy storage evaluation tool (BSET)?

Battery Energy Storage Evaluation Tool (BSET): BSET is a modeling and analysis tool enabling users to evaluate and size a BESS for grid applications. It models the technical characteristics and physical capability of a BESS. It also incorporates operational uncertainty into system valuation.

Are DOE's storage valuation tools free to use?

All of DOE's storage valuation tools compared in the current version of MSP are publicly accessible and free to use. They are designed to be easy to use without requiring knowledge of the modeling, optimization, and solution process behind them. Most of these tools can be used across a variety of platforms and devices.

How can energy storage help a vertically integrated utility?

Energy storage can be used by a vertically integrated utility to reduce operational costs and avoid or defer investment in generation, transmission, and distribution. Energy storage can participate in wholesale energy, ancillary, and capacity markets to generate revenue for storage owners.
