

Icelandic power plant energy storage company plant operation

Who owns a hydropower plant in Iceland?

Most of the hydropower plants are owned by Landsvirkjun (the National Power Company) which is the main supplier of electricity in Iceland. Landsvirkjun produces 12,469 GWh which is 75% of the total electricity production in Iceland.

Why is Iceland constructing a new power plant?

To meet growing demands for resources, Iceland is constructing the new Búarháls hydropower energy plant to feed clean electricity to power-intensive industries on the island. Ístak was hired as the main contractor to build the power plant in the southern part of the Icelandic highlands.

What makes Landsvirkjun a good power station?

In operating power stations, emphasis is placed on a holistic vision, where prudence, reliability and harmony of the operations with environment and society are the guiding principles. Landsvirkjun is the National Power Company of Iceland. We produce electricity from renewable energy sources; hydropower, geothermal energy, and wind.
