

Industrial battery cabinet tender price in Spain 2030

How much does a battery plant cost in Spain?

Battery plants picked up more than 655 MW of capacity in the auction, with a clearing price of €35.79 per kW a year. This volume was dwarfed by the almost 3 GW of capacity awarded to gas plants, which is likely a guide to what will happen in Spain as well.

How much storage capacity will Spain have by 2030?

The country plans to have 22 GW of storage capacity in place by 2030, said the ministry. This will include battery and pumped hydro plants, as well as potentially some thermal storage associated with concentrated solar power technology, which Spain is a leader in.

Are batteries set for a boost in Spain this year?

Batteries look set for a boost in Spain this year as the country introduces a capacity market to help integrate renewable energy into the grid. The launch of the nation's first capacity market was announced in October 2023, following a consultation in 2021. - It will a...

Can batteries access the balancing market in Spain?

Balancing markets are another key source of battery revenue, but regulatory reform is required for batteries to access the Spanish balancing market. This is likely to happen relatively quickly but creates uncertainty around the level of balancing revenues.

Why are battery storage options more suitable in Spain?

As a result, shorter duration storage options like batteries are more suitable in Spain. In Spain, over 50% of excess renewable energy occurs in periods where there is continuous excess for less than 12 hours i.e. a battery that chooses to charge on this energy would be able to discharge within 12 hours.

Could embedded flex be a competitor for batteries in Spain?

The rules and policy support that will apply for demand response remain unclear, but embedded flex could be a competitor for batteries in Spain (e.g. as we have seen in the UK). Behind the meter gas peakers and batteries have been a key source of demand response in other markets.

Spain's auction "a step in the right direction" as industry calls for more energy storage Solar project developer Recurrent Energy has secured a EUR674 million (US\$730 million) revolving ...

Spain's first large-scale solar PV plant with energy storage The Araúelo III plant, the first large-scale solar PV power plant integrated with an energy storage system in Spain, has been ...
