

What is a CPS inverter?

CPS inverters contain all required protective features, including an AC output breaker and DC pre-charge. This creates a cost savings compared to other inverters that require additional items for battery integration. Want to learn more about CPS-1250 / CPS-2500 Energy Storage Inverters?

What is a Fronius inverter and a DC-coupled storage system?

In contrast to AC-coupled storage systems, the combination of a Fronius inverter and DC-coupled storage system impresses with extremely high levels of efficiency. As surplus direct current can be loaded directly into the storage system from the PV system, the current is converted less often, which results in lower losses.

What is a cps-1250 & cps-2500 inverter?

Featuring a highly efficient three level topology, the CPS-1250 and CPS-2500 inverters are purpose-built for energy storage applications, providing the perfect balance of performance, reliability, and cost-effectiveness. The CPS-1250 and CPS-2500 are 1336 kVA (CPS-1250) and 2672 kVA (CPS-2500) bidirectional four quadrant capable converters.

How can a Fronius inverter help your business?

The combination of a Fronius inverter and a compatible storage system makes different backup power variants possible, from the basic backup power supply with the PV Point (with the GEN24 Plus) through to Full Backup. You can therefore offer your customers tailored solutions for increased independence.

Can I Retrofit a solar storage system without a hybrid inverter?

A combination with an AC-coupled storage system can be used for retrofitting a solar storage system for PV systems without a hybrid inverter. Fronius inverters are compatible with various AC-coupled storage systems, however visualisation in the Solar.web online monitoring tool is not possible with this solution.

Are Fronius inverters compatible with AC-coupled storage systems?

Fronius inverters are compatible with various AC-coupled storage systems, however visualisation in the Solar.web online monitoring tool is not possible with this solution. You can illustrate the effects of a storage system on self-consumption and autonomy to your customers very easily in Solar.web.
