

# Italian energy storage power station suspended

Is Italy's energy storage landscape undergoing a major shift in 2024?

Italy's energy storage landscape is undergoing a major shift, with utility-scale battery energy storage systems (BESS) experiencing exponential growth in 2024, even as residential and commercial & industrial (C&I) installations decline, according to a new report by industry group Anie. Utility-Scale BESS Dominates Market

Why did Italy expand its energy storage capacity last year?

Italy significantly expanded its energy storage capacity last year, driven by large-scale projects exceeding 1 MWh. Anie, a division of national business organization Confindustria, reported that installed storage capacity surged from 507 MWh in 2023 to 3,359 MWh in 2024, while installed power capacity jumped from 222 MW to 851 MW.

Why did Terna's battery installation decline?

Despite the boom in utility-scale storage, Terna's registration data revealed a drop in residential and C&I battery installations. The reasons behind this decline were not detailed in the report, but the trend suggests a shift in focus toward larger, grid-connected storage solutions.
