

# Large scale battery storage project financing options in Netherlands 2026

What is the largest battery storage project in the Netherlands?

Mufasa is the largest utility-scale battery storage project in the Netherlands to be fully funded through 100% non-recourse project financing of over EUR350 million (\$365.4 million).

Will the Netherlands support battery storage in solar PV projects?

Netherlands recently announced EUR100 million in subsidies for the development and integration of battery storage in solar PV projects covering about 160-330 MW for 2025, in response to emerging challenges related to grid constraints and renewable integration in the country.

Is Mufasa the largest battery energy storage system in Europe?

Dutch energy storage developer Lion Storage, part of Return, announces that project Mufasa--one of the largest battery energy storage systems (BESS) in the Europe--has successfully reached Financial Close. extensive experience financing energy transition projects.

Is project Mufasa a game-changer for battery storage in the Netherlands?

"Project Mufasa is a game-changer for battery storage in the Netherlands. As the first of its kind to secure full project financing, it proves that energy storage is not just viable--it's investable. Says Arno Hendriks, co-founder of Lion Storage.

What is the biggest BESS project in the Netherlands?

As the largest BESS in the Netherlands and one of the largest energy storage projects in Europe, it sets a new standard for balancing and securing power grids. Mufasa is the largest utility-scale battery storage project in the Netherlands to be fully funded through 100% non-recourse project financing of over EUR 350 million. The closing of Project

How much solar power does the Netherlands have?

The country's cumulative solar capacity is said to have exceeded 20 GW this year. Lion Storage has announced its flagship battery storage project 'Mufasa', with a nameplate capacity of 364 MW/1,457 MWh located in the Vlissingen port (North Sea Port), one of the upcoming energy hubs in the Netherlands.

In concurrent news, independent power producer (IPP) Energy Solutions Group (ESG) has completed financing and launched construction on its first large-scale BESS project in Harmignies, in the Wallonia region of Belgium. ...

At any scale, financing storage assets will require getting comfortable with technology risk. Mitigants include creditworthy suppliers standing behind extended contractual warranties; in ...

# Large scale battery storage project financing options in Netherlands 2026

Dutch developer Lion Storage has successfully reached financial close for its Mufasa project, one of the largest battery energy storage systems (BESS) in Europe. The ...

In autumn 2024 two draft regulations were published regarding state aid for large-scale electricity storage systems (BESS), one from the Modernisation Fund ("MF ") 1 - and the second under the National Recovery ...

Project Mufasa marks a significant milestone as the first large-scale battery storage project in the Netherlands to secure full project financing, with over EUR350m in funding. Macquarie Capital ...

Dutch energy storage developer Lion Storage, part of Return, announces that project Mufasa--one of the largest battery energy storage systems (BESS) in the Europe--has ...

Netherlands recently announced EUR100 million in subsidies for the development and integration of battery storage in solar PV projects covering about 160-330 MW for 2025, in ...

However, deploying large-scale battery energy storage projects remains challenging in the Netherlands due to the country's dense population, scarcity of land, and ...

The battery park is scheduled to begin operations in H1 2026. Credit: Phonlamai Photo/Shutterstock. Vattenfall has entered into an agreement with international energy storage company Return to oversee a new battery ...

Vattenfall and the international energy storage company Return have entered into an agreement under which Vattenfall will operate and optimise a large-scale battery park with a capacity of 50 megawatts for eight years. The ...

The project site in Dordrecht, a municipality in the western Netherlands. Image: Dispatch via LinkedIn. Developer Dispatch has begun construction on a 45MW/90MWh battery energy storage system (BESS) ...

European Market Outlook for Battery Storage 2025-2029 7 May 2025 The report explores trends and forecasts across residential, commercial & industrial (C& I), and utility ...

Germany's large-scale battery storage could witness 500% growth with 7 GWh of facilities More than 80 percent of smaller photovoltaic roof systems are already installed in ...

Netherlands-based developer Giga Storage has obtained the irrevocable permit for the construction of a 600 MW/2,400 MWh battery energy storage system (BESS) project in ...

Germany's BESS Installations Types (as of 2023) Total Grid-Scale BESS Capacity and Forecast (in GWh) Bundesverband Solarwirtschaft (BSW) forecasts an additional ~7 GWh of grid-scale BESS capacity by 2026.

# **Large scale battery storage project financing options in Netherlands 2026**

...

The project in The Netherlands will positively contribute to the grid challenges, however the large-scale deployment of energy storage in Netherlands is still hampered by high grid fees compared to our neighboring
