

What is the Journal of energy storage?

The Journal of Energy Storage focuses on various aspects of energy storage, particularly system integration, grid integration, modeling and analysis, novel energy storage technologies, scale and management strategies, as well as business models for the operation of energy storage systems and the global development of energy storage.

Who is interested in the Journal of energy storage?

The journal is also of interest to decision makers and technical, economic and policy advisers in these organisations. The Journal of Energy Storage welcomes original research papers, reviews and short communications.

What types of articles can I submit to energy storage?

Energy Storage welcomes submissions of the following article types : Brief Research Report, Correction, Data Report, Editorial, General Commentary, Hypothesis & Theory, Methods, Mini Review, Opinion, Original Research, Perspective, Policy and Practice Reviews, Review, Technology and Code.

What is energy storage & why is it important?

Energy storage is a key technology for realizing the future large-scale use of renewable sources, to reach the goal of carbon neutrality.

What are the different types of energy storage?

Thermal energy storage 3. Electro-magnetic energy storage 4. Mechanical energy storage 5. Electrochemical energy storage (predominantly covered in the section Electrochemical Energy Conversion and Storage Frontiers in Energy Research is member of the Committee on Publication Ethics.
