

Will China's new energy storage sector grow in 2024?

[WANG ZHENG/FOR CHINA DAILY]BEIJING -- China's new energy storage sector saw rapid growth in 2024, with installed capacity surpassing 70 million kilowatts, said an official with the National Energy Administration.

What is new energy storage?

New energy storage refers to electricity storage processes that use electrochemical, compressed air, flywheel and supercapacitor systems, but not pumped hydro, which uses water stored behind dams to generate electricity when needed. Our Standards: The Thomson Reuters Trust Principles.

Why is new energy storage important?

"New energy storage plays an essential regulatory role in the new power system, significantly promoting the development and consumption of renewable energy," Bian said. New energy storage features a high intensity of technology and a long industrial chain, and encompasses multiple sectors.

What is the 14th five-year plan for energy storage?

The "14th Five-Year Plan" has specified development goals for energy storage also on the provincial level. During the "14th FYP" period, 25 provinces and cities plan to complete 77.65 GW new type storage installation. That scale is more than twice the "14th FYP" target (30 GW) set by the NEA.

How long does energy storage last in 2024?

Highlights from the 2025 Energy Storage Report According to the NEA, 2024 saw the addition of 42.37 GW /101 GWh in new NES capacity. The average storage duration rose to 2.3 hours, reflecting ongoing improvements in system design and grid integration.

Does Cnesa have a role in China's new energy storage capacity?

CNESA's involvement reflects the report's collaborative yet government-led nature, ensuring data integrity and broad sectoral representation. The most notable finding: by the end of 2024, China had reached 73.76 GW /168 GWh in cumulative new energy storage capacity--an increase of more than 130% year-on-year.

5 ???· Announced by the National Development and Reform Commission (NDRC) and the National Energy Administration (NEA), the new plan is expected to drive CNY 250 billion (\$35.1 ...

Jinwu Financial News | On September 12, the National Development and Reform Commission (NDRC) and the National Energy Administration jointly issued the "Special Action Plan for ...

Accelerate the pilot demonstration of new energy storage technologies and key regions, and timely summarize

the practices and successful experiences that can be replicated ...

Recently, the National Development and Reform Commission and the National Energy Administration issued the "Special Action Plan for Large-scale Construction of New Energy ...

New energy is an important trend for future development, while hydrogen energy and new energy storage are key areas and critical technologies within this sector. ...

On September 12, the National Development and Reform Commission and the National Energy Administration issued the "Special Action Plan for Large-Scale Construction of New Energy ...

On 15 July, national plans for energy storage were set out by the Chinese National Development and Reform Commission and National Energy Administration. The main ...

Abstract: The development of energy storage technologies is still in its early stages, and a series of policies have been formulated in China and abroad to support energy storage development. ...

5 ???· China on Friday unveiled an action plan to promote the development of new forms of energy storage between 2025 and 2027, amid efforts to support green energy transition and ...

4 ???· Innovative storage models will be promoted to improve energy efficiency and support stable power supply in these scenarios. To support the integration of new energy storage into a ...

7 ???· On September 12, 2025, the National Development and Reform Commission (NDRC) and the National Energy Administration issued a notice on the "Action Plan for Large ...

BEIJING, Jan. 24 (Xinhua) -- China's new energy storage sector has seen a rapid growth in 2024, with installed capacity surpassing 70 million kilowatts, said an official with the National Energy ...

The State Council released a circular on the implementation plan to promote the high-quality development of new energy in the new era, drawn up by the National Development ...

Chinese authorities unveiled several measures on Monday to promote the new-type energy storage manufacturing sector, as part of efforts to accelerate the development of ...

Technological breakthrough and industrial application of new type storage are included in the 2023 energy work of the National Energy Administration (NEA).2 Energy electric industry is ...

4 ???· Announced by the National Development and Reform Commission (NDRC) and the National Energy Administration (NEA), the new plan is expected to drive CNY 250 billion (\$35.1 ...
