

Do I need a PSU for my RTX 4080?

Now that you understand the importance of a PSU for your RTX 4080, let's dive into the key factors you should consider when purchasing one. In general, a 750W power supply will be sufficient for a 4080. The wattage requirements of your PSU will depend on various factors, including the power draw of your RTX 4080, CPU, and other components.

Can a 650W PSU power an RTX 4080?

While a 650W PSU may technically be able to power an RTX 4080, it's generally recommended to use a PSU with a higher wattage for stability and to accommodate potential power spikes. A PSU with a capacity of at least 750W to 850W is usually more appropriate for a 4080 setup. What ATX 3.0 PSU is needed for 4080?

What power supply for RTX 4080?

An ATX 3.0 PSU with a wattage of 850W or more and a 16-pin power connector is typically recommended to power a RTX 4080. Examples include the ASUS TUF Gaming 850W and Corsair HX1000i. What power supply for 4080 and 7800x3d?

Do I need a 850w PSU for a 4080?

Yes, in fact, we'd recommend a PSU of 850W as a minimum to ensure you also have the power you'll need for the best CPUs for the 4080. Anything over 850W will also be helpful to give you the clearance you need (should your system require it).

Which NZXT power supply is best for RTX 4080?

The NZXT C750 Gold is a power supply unit that deftly combines performance, efficiency, and design. It's an ideal solution for powering lower specced builds for the RTX 4080, pairing well with CPUs like the Core i5 13600K or 13700K. One of its key strengths lies in its efficiency rating.

Does the RTX 40 series need a new power supply?

The RTX 40 Series doesn't require a new power supply if you already meet the PSU wattage recommendations. The RTX 4090 TGP is 450 W and the minimum recommended PSU is 850 W. The RTX 4080 16GB TGP is 320 W with a minimum recommended power supply of 750W, and the minimum recommended power supply for the RTX 4080 12GB is 700W.

??2%??&#0183; Yes, you can be safe knowing that as long as it's got 750W of power capacity, it'll be good for an RTX 4080, however, it's always nice to know more just in case, so here's the ...
