

School solar storage cost vs benefit calculation in Germany

Are solar energy systems profitable in Germany?

With further declining system prices for solar energy storage and increasing electricity prices, PV systems and SBS can be profitable in Germany from 2018 on even without a guaranteed feed-in tariff or subsidies. Grid utilization substantially changes by households with EV and PV-SBS.

Why do people store solar power in Germany?

To date, most battery storage systems in the German electricity system have been used exclusively to optimize self-consumption. Consequently, an exponentially growing number of homeowners and companies store solar power for times when solar generation is low.

Is decentralized solar power a viable source of energy in Germany?

Among other sources, decentralized electricity generation by solar power with photovoltaic (PV) systems penetrated the German market successfully during the last two decades. About one and a half million PV systems were installed until 2014 (BSW, 2014).

What is the future of solar power in Germany?

Sustained growth is forecasted in the market for new PV capacity for years to come. Concurrently, battery systems are expected to reach a capacity of at least 100 GWh by 2030, reflecting a transformative shift within the German energy system towards renewable energy integration.

Should you consider a home storage system in Germany?

Regional subsidies - it pays to be quick and informed! The first point of contact for anyone considering an electricity storage system should be their federal state-regional funding for home storage systems in Germany offers a wide and dynamic range of options, with new programs being set up all the time.

Do solar energy storage systems affect electricity sales?

Grid utilization substantially changes by households with EV and PV-SBS. We discuss effects of different incentives and electricity tariff options (e.g. load limits or additional demand charges). Concluding, solar energy storage systems will bring substantial changes to electricity sales. Previous article in issue Next article in issue Abbreviations
