

Sodium ion battery storage project financing options in China 2026

Why should China invest in sodium-ion batteries?

As a pivotal player in the global energy storage landscape, China's strategic focus on sodium-ion technology is yielding significant benefits. Sodium-ion batteries are emerging as a game-changer in the energy sector, and China's rapid deployment highlights this development.

Is China deploying sodium-ion batteries at a large scale?

China has made remarkable strides in deploying sodium-ion batteries at a large scale. One notable project is the 10 MWh Sodium-ion Battery energy storage station by China Southern Power Grid in the Guangxi Zhuang region. This initiative is just a part of a broader 100 MWh project in the area.

What does China's sodium-ion battery technology mean for the energy industry?

China's progress in Sodium-ion Battery technology signifies a critical moment in energy history, positioning the nation as a global leader in battery production. This advancement is not only reshaping the industry but also redefining global dynamics in the energy sector.

What's happening in the sodium-ion battery space?

See all our recent coverage of the sodium-ion battery space here, including a fundraise by Sweden-based Altris, a 100MWh sodium solid state battery factory in Germany and United Airlines investing in technology provider Natron Energy. A battery energy storage system project (BESS) using sodium-ion technology has been launched in Qingdao, China.

Is a battery energy storage system based on sodium ion technology?

A battery energy storage system (BESS) project using sodium-ion technology has been launched in Qingdao, China. The demonstration project of 5MW/10MWh was officialised last month (14 July) in a definitive agreement between project partners Great Power, a battery technology company, Qingdao Beian Holdings and Noan Technology Co.

How will sodium-ion batteries transform global battery supply chains?

The introduction of sodium-ion batteries is poised to transform global battery supply chains. With competitive advantages in cost and availability, these batteries offer new opportunities for energy storage solutions worldwide.

Next year is the first year of mass production of sodium-ion batteries, and by 2026, the industrial chain is expected to tally CNY48.4 billion (USD6.9 billion), it added. The project group will promote the technological ...

The wider deployment and commercialization of lithium-ion BESS in China have led to rapid cost reductions

Sodium ion battery storage project financing options in China 2026

and performance improvements. The full cost of an energy storage ...

These agreements are expected to provide significant momentum for the growth of the sodium-ion battery industry in Zigong. Industry specialists presented research ...

Cost remains a key factor in the commercial viability of sodium-ion batteries. HiNa Battery estimates that by 2025, the energy density and cell costs of its sodium-ion batteries will partially overlap with those of lithium iron ...

The first part of the world's largest sodium-ion battery energy storage system (BESS) has been launched in China. State media Yicai Global and technology provider HiNa Battery reported last week that the 50MW, ...

With geopolitical factors like China's restriction on graphite exports, sodium-ion technology stands poised to offer an alternative energy storage solution. The Future of Sodium ...

The project in Yunnan, China. Image: HiNa Battery. A 200MW/400MWh BESS project in China combining lithium-ion and sodium-ion batteries has been put into operation. ...

Farasis is also preparing to launch its second-generation sodium-ion batteries this year, with energy density of 160 to 180Wh/kg. And, the company projects it will achieve ...

As a pivotal player in the global energy storage landscape, China's strategic focus on sodium-ion technology is yielding significant benefits. Sodium-ion batteries are emerging as a game-changer in the energy sector, ...

Introduction In a groundbreaking development for energy storage technology, Sineng Electric has launched the world's largest sodium-ion battery energy storage system (BESS) in Qianjiang, Hubei province, China. ...

"China Southern Power Grid (CSG) announced on May 26 the commissioning of the Baochi Energy Storage Station in Wenshan, Yunnan province -- a national pilot project and the first large-scale hybrid lithium ...

See all our recent coverage of the sodium-ion battery space here, including a fundraise by Sweden-based Altris, a 100MWh sodium solid state battery factory in Germany and United Airlines investing in technology provider ...

In December 2024, sodium-ion battery technology developer Yingong Technology announced the completion of a nearly 100 million yuan Pre-A round of financing. This round ...

Because sodium is so plentiful and cheap, companies in the space estimate that sodium-ion storage systems could eventually be around 40% less expensive than lithium-ion systems, once manufacturing scales.

Sodium ion battery storage project financing options in China 2026

In recent news, the power company China Three Gorges Corporation (CTG), along with industry and government partners, launched the world's first gigawatt-hour (GWh)-class sodium-ion battery (SiB) production line ...

China Southern Power Grid (CSG) announced on May 26 the commissioning of the Baochi Energy Storage Station in Wenshan, Yunnan province -- a national pilot project and the first large-scale hybrid lithium ...
