

Successful bid price of rooftop solar storage project in

Who can bid on solar PV modules?

Bidders could also be manufacturers of solar PV modules, which are included in the latest Approved List of Models and Manufacturers. Alternatively, bidders can be distributors/dealers of solar PV modules who should have supplied modules with a cumulative capacity of at least 2 MW in the preceding financial year.

What is the minimum solar project size?

The only exception to this is in north-eastern states and 'special' category states that are already earmarked to receive greater government subsidies to cover the cost of rooftop PV additions. In these states, the minimum project size is 30 MW of solar, plus 15 MW/60 MWh of batteries.

How often will a solar project be released?

It will be released in ten equal installments every year after a defect liability period (i.e. First installment starts from 24th month from the date of project completion / acceptance) subject to successful: Integrated project performance of minimum solar energy generated 1400

What is the minimum solar capacity required for a solar project?

Projects are required to have a minimum solar capacity of 50 MW, with a minimum storage component of 25 MW/100 MWh. This ratio of solar to storage capacity must be respected for projects of a larger capacity; for instance, a 600 MW solar project must be co-located with a 300 MW/1,200 MWh storage component.

Power Grid Corporation of India has invited bulk contract bids to supply and install 7 MW of rooftop solar systems on its buildings in northern and western regions under the PM Surya Ghar: Muft Bijli Yojana. The northern ...
