

# Summary of the energy storage industry graphic analysis report

As of the end of September 2020, global operational energy storage project capacity (including physical, electrochemical, and molten salt thermal energy storage) totaled 186.1GW, a growth of 2.2% compared to Q3 of ...

Deloitte's Renewable Energy Industry Outlook draws on insights from our 2024 power and utilities survey, along with analysis of industrial policy, tech capital, new technologies, workforce development, and carbon management, to ...

As of the end of September 2020, global operational energy storage project capacity (including physical, electrochemical, and molten salt thermal energy storage) totaled ...

The U.S. Energy Storage Monitor is offered quarterly in two versions- the executive summary and the full report. The executive summary is free and provides a bird's eye view of the U.S. energy storage market and the trends ...

First established in 2020 and founded on EPRI's mission of advancing safe, reliable, affordable, and clean energy for society, the Energy Storage Roadmap envisioned a desired future for energy storage applications ...

The U.S. energy storage market size crossed USD 106.7 billion in 2024 and is expected to grow at a CAGR of 29.1% from 2025 to 2034, driven by increased renewable energy integration and grid modernization efforts.

The UAE battery energy storage systems (BESS) market held the largest share of 34.85 % of the Middle East market in 2024. The battery energy storage systems (BESS) market in the Middle ...

**Thermal Energy Storage Market Summary** The global thermal energy storage market size was valued at USD 4.1 billion in 2019 and is projected to grow at a compound annual growth rate ...

The New Energy Outlook presents BloombergNEF's long-term energy and climate scenarios for the transition to a low-carbon economy. Anchored in real-world sector and country transitions, it provides an independent set of credible ...

**Thermal Energy Storage Market** grow at a CAGR of 7.99% during forecast period of 2025-2035 with growing demand for thermal energy storage in HVAC. Global Industry Analysis by size, share, growth, sales, trends, technology, key ...

**Executive Summary** The rapid expansion of renewable energy has both highlighted its deficiencies, such as

# Summary of the energy storage industry graphic analysis report

intermittent supply, and the pressing need for grid-scale energy storage ...

This report demonstrates what we can do with our industry partners to advance innovative long duration energy storage technologies that will shape our future--from batteries to hydrogen, ...

The report also covers the size and forecasts of the energy storage market across major regions. For each segment, market sizing and forecasts have been done based ...

The Global Energy Storage Market Outlook Update (MOU) provides a ten-year market outlook update from 2023 to 2033. It covers the key market trends, global competitions, policy updates, and projected capacity ...

Continued expansion of intermittent renewable energy, ESG-focused investments, the growing versatility of storage technologies to provide grid and customer services, and declining costs ...

**Thermal Energy Storage Market Summary** The global thermal energy storage market size was valued at USD 4.1 billion in 2019 and is projected to grow at a compound annual growth rate (CAGR) of 9.4% from 2020 to 2027.
