

# The latest energy storage policy news from china and europe

What is China's energy storage policy?

A key point of the proposed energy storage policy is the pairing of renewables - wind and solar - investments with storage systems equivalent to 5-20% of renewable capacity in China's still highly regulated power market.

Will China's energy storage policy triple our capacity forecast?

China's proposed policy to accelerate energy storage deployments - with a target to take its energy storage capacity to 30 gigawatts (GW) by 2025 - could triple our current capacity forecast. The five-year timeframe could prove challenging from an economic standpoint, but China has good reason to push ahead.

What is the European Commission doing about energy storage?

In 2020, the European Commission published a study on energy storage, which summarized some previous studies and reports, explored current and potential energy storage markets in Europe, and set out policy and regulatory recommendations for energy storage.

5 ???&#0183; Announced by the National Development and Reform Commission (NDRC) and the National Energy Administration (NEA), the new plan is expected to drive CNY 250 billion (\$35.1 ...

With the proposal of the "carbon peak and neutrality" target, various new energy storage technologies are emerging. The development of energy storage in China is ...

China is aiming for 50% electricity generation from renewable power by 2025, up from 42% currently. China is targeting a non-hydro energy storage installed capacity of 30GW ...

Both the EU and China have ambitious energy storage goals, but China's centralised approach allows quicker policy implementation. While the EU's policy landscape is more mature than ...

Energy storage installations around the world are projected to reach a cumulative 411GW by the end of 2030 - 15 times the 27GW of storage that was online at the end of 2021, according to ...

However, a new policy introduced in February 2025 requires 100% of solar and wind generation to be traded on the wholesale power market. This policy removes energy ...

Tesla has unveiled two new energy storage products: Megapack 3, the latest generation of its utility-scale energy storage system, and Megablock, which integrates ...

Both regions have rolled up their sleeves to tackle grid instability and renewable intermittency through bold

# The latest energy storage policy news from china and europe

policy frameworks. But here's the kicker: China-Europe energy ...

1 ???#0183; Visitors view a model of a virtual power plant's electrical system at the International Digital Energy Expo 2024 in Shenzhen, Guangdong province, on Sept 8, 2024. CHEN WEN/CHINA ...

8 ???#0183; The policy and regulatory roadmap is aimed at pushing China's installed base of large-scale energy storage - primarily lithium-ion battery energy storage systems (BESS) - to ...

However, a massive wave of investment in mainland China in 2022-23 has led to significant over-capacity globally, with nameplate capacity outstripping demand by more than ...

5 ???#0183; Announced by the National Development and Reform Commission (NDRC) and the National Energy Administration (NEA), the new plan is expected to drive CNY 250 billion ...

5 ???#0183; China on Friday unveiled an action plan to promote the development of new forms of energy storage between 2025 and 2027, amid efforts to support green energy transition and ...
