

What does little sun do?

By working with communities, businesses, civil society, and governments, Little Sun delivers affordable clean energy solutions to those who need it most. Solar energy enables children to study at night. Farmers can irrigate their fields and process crops to increase yields.

What makes the Little Sun a good solar lamp?

The Little Sun's outer yellow shell is made of a highly weather resistant plastic. This means it can withstand harsh conditions and still last a long time. Made with the world's most efficient solar energy cells and long lasting battery to store the energy, the Little Sun is more effective and less expensive than lamps that rely on oil.

What products does little sun sell?

Their products include the Little Sun Original lamp, Little Sun Charge phone charger, and the Little Sun Diamond lamp. In 2021, Little Sun launched a culture program to engage artists to work about climate change. Its aim is to broaden the often data-driven climate conversation.

What is the little sun lamp?

Their collaboration produced the Little Sun lamp--a small, portable, solar light--that was first distributed to people living without electricity in Ethiopia. The lamp is a practical tool that enables students to study after dark, mothers to take better care of their children at night, and families to reduce the effects of toxic fumes from fuel.

Why is the little sun lamp a good idea?

The Little Sun lamp is an example of how thoughtful and sustainable design can create opportunities for its users. People without access to electricity have the opportunity to carry out activities, like reading or cooking where they were previously unable to.

Why did little sun distribute solar phone chargers to community health workers?

Health From 2012 to 2025 Little Sun distributed solar phone chargers to Community Health Workers so that they can access data tools and patients' records, provide more accurate diagnoses, communicate more efficiently, and work more safely after sunset.
