

Implementation: In August 2023, Hebei's Development and Reform Commission accelerated plans to refine the industrial chain and integrate these resources into national ...

On December 27, the National Energy Administration announced new energy storage pilot demonstration projects. Energy storage technologies include compressed air energy storage, ...

On January 29th, the Development and Reform Commission of Shaanxi Province issued a letter soliciting opinions on the draft of the Implementation Plan for the Development of New Energy ...

The Municipal Development and Reform Commission mentioned on February 24, there were 242 key projects started in the city in the first quarter, with a total investment of ...

On 24 March 2024, the Sichuan Provincial Development and Reform Commission and the Sichuan Provincial Energy Bureau announced the first batch of new energy storage ...

New Energy> Sichuan Panzhihua Development and Reform Commission: reached an investment intention of nearly 200,000 cubic meters of vanadium electrolyte production with Kaifeng ...

As a technology with the longest development time, the most mature technology and the highest degree of commercialization among the current flow batteries, the all-vanadium ...

The national demonstration project of 100MW/400MWh vanadium battery energy storage peak-shaving power station in Dalian, which has entered the commissioning stage at ...

At the local level, on February 20, the Sichuan Provincial Development and Reform Commission issued the "Interim Guidelines for the Safety Management of New Energy Storage Power ...

Vanadium redox (flow) battery (VRB®) systems are poised to transform the largest utility grid in the world with low-cost, long-life performance in support of significant growth in solar and win...

The station will facilitate technological collaboration, policy advocacy, and project promotion, supporting Liangshan's goal to become a hub for vanadium flow battery (VFB) ...

The city is promoting the construction of 1.3 million kilowatts of energy storage, including 1.2 million kilowatts of Renhe Pumped Storage Power Station (Phase I) and 100,000 kilowatts of ...

The vanadium flow battery (VFB) as one kind of energy storage technique that has enormous impact on the stabilization and smooth output of renewable energy. Key materials like ...

The National Development and Reform Commission, the National Energy Administration and the National Data Administration have formulated the Action Plan for Accelerating the Construction ...

China Energy Storage Network News: On 18 October, at the opening ceremony of the 2023 China (Shandong) Energy Storage High-Quality Development Conference, Shandong Flow Battery ...

Title: Pu Neng Wins Contract for the Largest Vanadium Flow Battery in China as the China National Development and Reform Commission Initiates a Major Push for Energy Storage in ...
