

# Wind solar storage cost breakdown in Bulgaria 2026

Why is energy storage growing in Bulgaria?

Energy storage in Bulgaria is expanding rapidly as the government awards nearly 10 GWh of capacity to 82 projects, boosting renewable energy reliability and grid stability.

How big is Bulgaria's solar PV capacity in 2024?

At the close of 2024, Bulgaria's solar PV capacity had already reached 3.91 GW--an annual increase of over 1 GW. These developments come on the heels of Bulgaria's first renewable energy auction held in late 2024, where more than 3 GW of generation and 1.176 GW of storage capacity were secured.

Is Bulgaria moving towards a greener energy future?

Bulgaria is taking bold steps toward a greener energy future, having recently wrapped up its most ambitious energy storage tender to date.

How will the selected storage systems be distributed in Bulgaria?

The selected storage systems will be geographically distributed across Bulgaria and connected either to the national transmission grid or local distribution networks. All awarded projects must be operational by March 2026.

How much money does the NRRP provide for energy projects in Bulgaria?

Under the RESTORE initiative, launched through Bulgaria's National Recovery and Resilience Plan (NRRP), the Ministry of Energy has selected 82 projects that will collectively receive BGN 1.15 billion (approximately \$675 million) in public funding.

How much funding does Bulgaria have for a decarbonization project?

Grant funding is capped at BGN 148.6 million per project, covering up to 50% of eligible costs, and limited to BGN 371,607.70 per MWh of usable capacity (excluding VAT). This tender marks a significant milestone in Bulgaria's broader decarbonization agenda.

Fortunately, Bulgaria sits in the privileged position where it can profit from the experiences of other energy systems with high renewable shares. Here, battery-based energy storage is integrated ...

This report provides an in-depth look at the market for distributed solar PV for both households and businesses (i.e. residential and commercial prosumers) in Bulgaria. Prosumers are defined ...

In recent years, Bulgaria has increasingly prioritized the development of energy storage infrastructure as part of its broader transition to a more sustainable and resilient energy system. With growing renewable energy ...

# Wind solar storage cost breakdown in Bulgaria 2026

The recent sharp increase in solar photovoltaic capacity and the expected increase of wind power capacity in Bulgaria will require a fast increase in energy storage facilities to avoid grid instability.

Future Years Projections of utility-scale PV plant CAPEX for 2035 are based on bottom-up cost modeling, with 2022 values from (Ramasamy et al., 2022) and a straight-line change in price in the intermediate years between 2022 and 2035. ...

In Hungary, up to 45% of the project costs for large-scale battery storage are covered by grants, in addition to a CfD program and grid connection facilitations. See also: Central & Eastern Europe - Utility-scale storage market ...

The Ministry of Energy has launched the "National infrastructure for storage of renewable energy" (RESTORE) procedure of the National Recovery and Sustainability Plan. ...

Solar-plus-storage shifts some of the solar system's output to evening and night hours and provides other grid benefits. NREL employs a variety of analysis approaches to understand the factors that influence solar-plus ...

Table 1 summarizes updated cost estimates for reference case utility-scale generating technologies specifically two powered by coal, five by natural gas, three by solar energy and by ...

More ambitious projects - a European funded tender scheme for 1.4 GW/1.68 GWh renewables- plus-storage as well as 6 GWh of stand-alone storage - were previously announced but still ...

All technologies demonstrate some degree of cost variability, based on project size, location, and access to key infrastructure (such as grid interconnections, fuel supply, and transportation). For ...

This comprehensive report provides a detailed overview of the regulatory advancements, investment opportunities, and challenges shaping the future of wind energy in ...

The solar power plant's estimated output is equivalent to the electricity needs of more than 45,000 Bulgarian households. PPC has 550 MW in project pipeline in Bulgaria PPC Group runs an 18 MW wind farm called Garda ...

These estimates show the average forecast prices for pay-as-produced PPAs in the period 2026-2035, which are necessary to cover the costs of new construction, operation and financing of new plants. Strong price ...

In recent years, Bulgaria has increasingly prioritized the development of energy storage infrastructure as part of its broader transition to a more sustainable and resilient energy ...
