

Wind solar storage tender price in Greece 2026

How many renewable electricity auctions will Greece hold in 2024?

The Greek Ministry of Environment and Energy released an updated version of the timetable for renewable electricity auctions. The new schedule sets the time and the capacity for each auction, while it calls for four auctions to be held this year and five in 2024.

How long does it take to get solar power in Greece?

For special auctions, the timeline is 23 months for solar power and 24 months for wind. Projects combining renewables and storage will have 36 months for wind and 30 months for PV. Additionally, the Greek government announced an international tender for the development of four geothermal fields in Eastern Macedonia and Thrace.

How much is a feed-in tariff for a solar project in Greece?

The new law has also put an end to feed-in tariffs for solar projects up to 500 kW in size. Developers of such installations with the necessary licenses can sign contracts with Greece's Renewable Energy Sources Operator and sell the generated electricity in the electricity market at a feed-in tariff of EUR65.73 (\$71.37)/MWh.

How much will solar power cost in 2023?

In 2023, auction prices are set at EUR 70 per MWh for PV and EUR 83 per MWh for wind farms. Winners of joint tenders will have a maximum of 36 months for wind projects and 30 months for PV. For special auctions, the timeline is 23 months for solar power and 24 months for wind.

How many GW of solar capacity does Greece have?

Image: Sandia National Laboratories, Wikimedia Commons Since 2016, when Greece introduced its competitive auction framework for renewable energy and held its first PV tender, the country has awarded more than 2 GW of solar capacity.

Will there be a solar auction in 2024?

There will be a joint auction in the second quarter of 2024 for 500 MW in wind and PV, followed by a joint auction for renewable electricity projects with storage for 200 MW in total.

Greece has allocated almost 200 MW of capacity in its third tender for battery energy storage systems (BESS), the last edition in its programme seeking to boost the technology's wider adoption.

Results from the tender, launched at the start of this month, were announced by the country's Regulatory Authority for Energy (RAE). The tender was conducted online and ...
