

What is a residential energy storage system?

The residential energy storage system uses the solar power generation device on the roof, and the low-cost power source of the social power supply system. The abundant power is stored in the energy storage system for use in peak hours. It can not only be used as emergency power supply, but also save power expenditure for families.

Who are Yiyen customers & users?

Yiyen customers & users have covered more than 100 countries and regions around the world. Provide the latest information of the electronic and electrical technology industry and company exhibition news. energy storage and power quality system solutions.

Where will Yiy be held?

This attracted the attention of many merchants and partners. We warmly invite all of you to YIY stands in Area C ,Hall 14.3 A01-02 & Area C ,GC 01-02 to be held at the Canton Fair Complex. We are a provider of energy storage and power quality systems, dedicated to making energy and ecology more harmonious.
