

A spinoff of Journal of Energy Storage, Future Batteries aims to become a central vehicle for publishing new advances in all aspects of battery and electric energy storage research.

2 Zejing Lin; Minglei Mao; Tianshi Lv; Shuwei Li; Yong-Sheng Hu; Hong Li; Xuejie Huang; Liquan Chen; Liumin Suo*; Electroactive-catalytic conductive framework for aluminum-sulfur batteries, ...

Air sensitivity remains a substantial barrier to the commercialization of sodium (Na)-layered oxides (NLOs). This problem has puzzled the community for decades because of ...

As a result, pairing this aligned membrane with a vanadium flow battery leads to a high energy efficiency of >80% at 200 mA cm⁻² and remarkable stability over 1,000 cycles. This work ...

"A high-performance supercapacitor-battery hybrid energy storage device based on graphene-enhanced electrode materials with ultrahigh energy density", Fan Zhang, Tengfei Zhang, Xi ...

Carbon-2D Materials Energy Storage Materials ?? ...

Zinc-based flow batteries are recognized as one of the most promising stationary energy storage systems due to their advantages of high energy density and low cost. However, ...

Prof of Chemistry and Material Science, Nankai University - Cited by 91,179 - Organic Solar Cell - Functional Polymer Materials - Nano Carbon - Energy Conversion and Storage

As an emerging multivalent-ion-based energy storage device, aqueous zinc-ion capacitors (AZICs) combine the merits of zinc-ion batteries with high energy density, excellent safety, low ...

Abstract: With the increasing demand for low-cost energy storage systems, more and more researchers and engineers have been involved in the fundamental research and engineering ...

Energy Storage Materials "Unlocking plateau capacity with versatile precursor crosslinking for carbon anodes in Na-ion batteries" ...
